

WorldWideScience.org

An International Partnership Supporting Open Science

- ▶ Simultaneously searches over 100 databases from more than 70 countries, in real-time – with no special indexes or site maps required
- ▶ Easy access to information from international partners, via multilingual translations capabilities for ten languages

Search and Access Scientific Research Data

Data tab identifies results from scientific research data collections

WorldWideScience members and database owners benefit from increased usage and dissemination of their scientific and technical information, regardless of format.

Parameter	Start Time	Unit	Principal Investigator	Method	Comment
