Brian Hitson is Director of the U.S. Department of Energy (DOE) Office of Scientific and Technical Information (OSTI), a DOE corporate function that is managed by the Office of Science. OSTI fulfills agency-wide responsibilities to collect, preserve, and disseminate scientific and technical information emanating from DOE research and development (R&D) activities. Prior to becoming Director, Brian led a range of OSTI's programmatic and administrative activities. He has also managed OSTI's international information exchange programs, as well as the digitization and preservation of a scientific document repository. As Director, he has led strategic efforts to improve discoverability and linkages between diverse, related research objects, including publications, datasets, and scientific software available at OSTI.GOV. He played a key role in the development of WorldWideScience. org and in the establishment of the WorldWideScience Alliance in 2008.

Library Guides are a Key Resource in the Field of Grey Literature

GreyNet LIS INFORMATION GATHERING GROUP :
RESEARCH/LIBGUIDES, ONLINE COURSES AND WEBINARS

Selected Directory of Research/LibGuides, Online Courses, and Webinars Devoted to Grey Literature Worldwide

The countries selected for this directory were chosen according to the OECD List of Member Countries. The majority of grey literature material has been produced from these geographic zones, as well as serving as the country of origin of the majority of GreyNet community members. It was felt that this method would be a valid representative sample to work with. Further, as GreyNet is an international organization, it was decided that only materials produced in English would be included. *Marcus Vaska, LIS Chair*
