GL15 Keynote Address

By Prof. Dr. Debbie Rabina, Pratt Institute, New York

15th International Conference on Grey Literature

**Slovak Centre of Scientific and Technical Information
Bratislava, Slovak Republic, December 2-3, 2013**

Debbie Rabina is associate professor at Pratt Institute, School of Information and Library Science. Her research and teaching are within the areas of information policy, official information and scholarly communication, and informed by the belief that societies that exercise a policy of open dissemination of and access to information are those that

allow their citizenry to achieve personal and societal goals. Debbie is immediate past member of the Depository Library Council, an advisory board to the Public Printer of the United States, heads and World Information Societies and Environments concentration at Pratt and is a member of the Content working group of the Library of Congress, National Digital Stewardship Alliance. She publishes regularly in the LIS field, most recently in Journal of Documentation, JELIS, Advances in Librarianship and The Grey Journal, TGJ. <http://www.textrelease.com>

GreyNet Award 2013

To Marcus Vaska, University of Calgary, Alberta, Canada

10th Annual Award Dinner on December 1, 2013

Marcus Vaska is a librarian with the Knowledge Resource Service (KRS), University of Calgary, Holy Cross Site, providing research and information support at an Alberta Cancer Care research facility. A firm supporter of embedded librarianship, Marcus engages himself in numerous

activities, including instruction and research consultation, with research teams at Holy Cross and beyond. Marcus' current interests focus on collaborative educational techniques aimed at creating greater awareness and bringing grey literature to the forefront in the medical community. Nominations for the **GreyNet Award** are based on (1.) Results from the GL14 Participant Evaluation Forms, (2.) Publication of the author's paper in the GL14 Conference Proceedings, (3.) Selection and publication of the author's paper as a journal article, thus exporting and distributing research results originating in the GL-Conference Series, and (4.) Prior history of the author in the field of grey literature. <http://www.greynet.org>

Enhanced Publications Project (EPP), Frequently Asked Questions

Dominic Farace and Jerry Frantzen, GreyNet International, Netherlands
Christiane Stock, OpenGrey Repository, INIST-CNRS, France
Paula Witkamp, Data Archiving and Networked Services, DANS, Netherlands

May 10, 2013

1. What does EPP stand for?

EPP stands for Enhanced Publications Project, an endeavor to capture and cross link metadata, research data, full-text, and post-publication data related to GreyNet's collection of conference preprints in the OpenGrey Repository
<http://www.opengrey.eu/search/request?q=greyenet>

2. What is meant by cross-linking?

Because of diverse and varied formats, research data require a robust data archive for storage, retrieval, and preservation. DANS Archive provides such capabilities. Cross-linking takes place when persistent identifiers assigned to GreyNet's records in DANS become part of the metadata in the OpenGrey Repository. In turn, the persistent identifier or handle assigned to GreyNet records in the OpenGrey Repository is included in its corresponding DANS record. Cross-linking thus allows the user to navigate easily among the full range of available data and information contained in an enhanced publication.

3. What are the preferred formats for research data?

Research data is considered first and foremost to be reusable, statistical data in formats such as Excel, SPSS, etc. Also accompanying these primary data files are other accepted files such as audio-visual, text files, spreadsheets, statistical files, databases, and the like. Often such data are too extensive for the page confines on a published article; however they are integrally related to the research. DANS provides online access to a list of preferred and accepted file formats
<http://www.dans.knaw.nl/sites/default/files/file/EASY/DANS%20preferred%20formats.pdf>

4. Is DANS the only data archive for GreyNet related research?

The author/researcher may opt to submit his/her research data to another national or resident data archive. If so, the author/researcher is responsible to provide GreyNet with the persistent identifier assigned to the record so that GreyNet can complete the cross-linking.

5. Who is responsible for the input of research data?

The author/researcher can submit his/her data to GreyNet, who in turn will input the research data and carry out the cross linking. Or, the author/researcher can directly input his/her data in DANS or another data archive of choice. In such cases, the full-text paper and accompanying data file(s) should be uploaded at the same time the data record is created. Text entered in the "Description field" should aim to describe the research data. Also the term 'grey literature' should be included in the "Subject field". Further, links to both OpenGrey www.opengrey.eu and GreyNet www.greynet.org should be included in the "Relation field". To facilitate direct data entry in the DANS Archive, visit <http://www.dans.knaw.nl/sites/default/files/file/factsheets/Factsheet%20Your%207%20steps%20to%20sustainable%20data%20DEF.pdf>

6. Is retrospective input of research data welcome in the DANS Archive?

Yes, all research data related to GreyNet's collection of conference preprints from 1994 till the present are actively solicited for entry in DANS. Click [here](#) to access GreyNet's collection of research data in the DANS Archive.

7. Who stands to benefit from open access to research data?

First and foremost the authors and researchers, who are then followed by other stakeholders in the information chain. Open access to research data inherently contributes to the review process, visibility of grey literature, and scholarly communication within and among the sectors of government, academics, business and industry. While the author/researcher may opt for restricted access to their data, non-restricted open access is preferred.

National Technical Library

National Technical Library (hereafter referred to as "NTK") is a central professional library open to public, which offers a unique collection of 250 thousand publications freely accessible in open circulation. Its holdings form the largest collection of Czech and foreign documents from technology and applied natural sciences as well as associated social sciences. It contains a total of 1.2 ML volumes of books, journals and newspapers, theses, reports, standards, and trade literature in both printed and electronic forms. Besides its own collection, parts of Central Library of the CTU in Prague and Central Library of the ICT holdings are accessible in NTK.

For detailed information on the National Technical Library visit <http://www.techlib.cz/en/>

As corresponds to its statutes, NTK manages - among others - the project of building the **National Repository of Grey Literature**. The project aims at gathering metadata and possibly full texts of grey documents in the fields of education, science and research. The NTK supports an education in the field of grey literature through annual seminars in the Czech Republic.

For more information on the National Repository of Grey Literature visit our project Web site <http://nrgl.techlib.cz/> and/or for a search <http://www.nutl.cz/>

About GreyNet Newsletter

This serial publication endeavors to keep information professionals abreast of developments in the field of grey literature. The quarterly newsletter gives exposure to GreyNet's information resources and frontline activities with special emphasis on the International Conference Series on Grey Literature. The GreyNet Newsletter is licensed by EBSCO Publishing and can also be accessed via the Library, Information Science & Technology Abstracts (LISTA-FT) full-text database. This serial publication is made possible through the support of GreyNet's Associate Members and Corporate Authors: CVTISR (Slovak Republic), ISTI-CNR, (Italy), Nuclear Information Section, NIS-IAEA (Austria), FEDLINK of the Library of Congress (USA), INIST-CNRS (France), New York Academy of Medicine (USA), National Technical Library (Czech Republic), and EBSCO Publishing (USA), Korea Institute of Science and Technology Information, KISTI.

Grey Literature is a field in library and Information science that deals with the production, distribution, and access to multiple document types produced on all levels of government, academics, business, and organization in electronic and print formats not controlled by commercial publishing i.e. where publishing is not the primary activity of the producing body.
