## Data Papers provide an Innovative Tool for Information and Data Management

<i>As of August 31<sup>st</sup> 2020</i>	With Data Papers	Without Data Papers
<b>GreyNet's Datasets in DANS</b>		
<b>46 Datasets</b>	16 (34.8%)	30 (65.2%)
<b>899 Downloads</b>	423 (47.1%)	476 (52.9%)
<b>Average Downloads per Dataset</b>	26.4	15.9

This study seeks to demonstrate how the data paper provides an innovative tool for information and data management, as part of an "ecosystem" of conference proceedings, journal articles, research data and open repositories. It relies upon GreyNet's current collection of 46 published datasets and 16 data papers. The study highlights the importance of the human contribution for the writing of data papers and the enrichment of their metadata. To this end, key shared components of GreyNet's collection of data papers are discussed, namely the stakeholders, linked metadata, open data archiving, preservation, and issues of quality and information rights. The study concludes from a user perspective by addressing the value of data papers drawn from available statistics.

### GreyGuide in OpenDOAR

OpenDOAR is the quality-assured, global Directory of Open Access Repositories. The GreyGuide Repository fulfils OpenDOAR criteria and has been added to the system. The GreyGuide Repository and Portal was launched as a collaborative effort between GreyNet International and CNR-ISTI, Pisa, Italy. The GreyGuide seeks to capture proposed as well as published good practices dealing with the supply and demand sides of grey literature. The site interface is available in English.

Grey Literature

## Digital Commons

### Grey Literature Digital Commons

Grey literature is based on the exchange of knowledge and culture by sharing, modifying, and communicating it within the public domain. In order to accomplish this, there is a need for greater flexibility in sharing knowledge, culture, and research results online. GreyNet International seeks to build stronger alliances with organizations in government, academics, business and industry along the lines of a Digital Commons for grey literature. If your organization would be interested in exploring this grassroots initiative, please contact [info@greynet.org](mailto:info@greynet.org)

### Your 7 steps to sustainable data

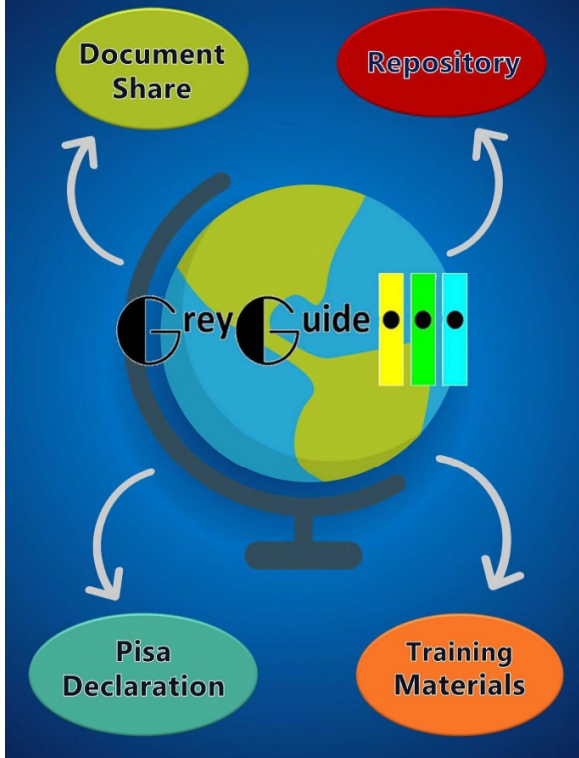

- 1. Prepare your data**  
Select the relevant data files. Check them for privacy aspects and file format against the guidelines issued by DANS.
- 2. Go to EASY**  
Log in at <https://easy.dans.knaw.nl>. If you are new to EASY, you will have to register for an account first.
- 3. Start the deposit procedure**  
Go to 'deposit your data', select your discipline and click 'start deposit'.
- 4. Documentation and access level**  
Describe the dataset and indicate whether it is open access or whether access restrictions apply.
- 5. Upload your data files**  
Select your data files and click 'upload dataset'.
- 6. Submit your data files**  
Accept the licence agreement and send your dataset to DANS by clicking the 'submit' button.
- 7. Publication by DANS**  
DANS will verify the dataset and publish the description you made. Your data have now been sustainably archived and will be accessible to others on a permanent basis under the conditions you specified.
